No part of this publication may be reproduced or transmitted in any form or by any means, electronic or mechanical, including photocopy, recording, or any information storage and retrieval system, without permission in writing from the copyright owner.

The appearance of the code at the bottom of the first page of an article in this journal indicates the copyright owner's consent that copies of the article may be made for personal or internal use, or for the personal or internal use of specific clients. This consent is given on the condition, however, that the copier pay the stated per copy fee through the Copyright Clearance Center, Inc. (Operations Staff, P.O. Box 765, Schenectady, New York 12301), for copying beyond that permitted by Sections 107 or 108 of the U.S. Copyright Law. This consent does not extend to other kinds of copying, such as copying for general distribution, for advertising or promotional purposes, for creating new collective works, or for resale. Copy fees for pre-1978 articles are the same as those shown for current articles.

CONTENTS OF VOLUME 13

Number 1, February 1978

M. T. Clegg. Dynamics of Correlated Genetic Systems. II. Simulation Studies of Chromosomal Segments under Selection 1

P. J. Avery. Selection Effects in a Model of Two Intermigrating Colonies of Finite Size 24

Timothy Prout. The Joint Effects of the Release of Sterile Males and Immigration of Fertilized Females on a Density Regulated Population 40

Graham H. Pyke. Optimal Foraging: Movement Patterns of Bumblebees Between Inflorescences 72

Ilan Eshel. On the Mutual Maintenance of a Polymorphism in Two Nonepistatic Loci with Partial Selfing 99

Walter T. Kyner and David A. Sánchez. Asymptotic and Numerical Approximation of Roots of Lotka's Equation 112

Eviatar Nevo. Genetic Variation in Natural Populations: Patterns and Theory 121

Number 2, April 1978

O. D. Anderson. On Sorting out Poole's Paper "Stochastic Difference Equation Predictors of Population Fluctuation" about the Box–Jenkins Analysis and Forecasting of Ecological Time Series 179

Robert W. Poole. A Reply to Anderson 190

Guy L. Curry, Richard M. Feldman, and Kirby C. Smith. A Stochastic Model of a Temperature-Dependent Population 197

R. A. Littler and A. J. Good. Ages, Extinction Times, and First Passage Probabilities for a Multiallele Diffusion Model with Irreversible Mutation 214

P. O'Donald. Theoretical Aspects of Sexual Selection: A Generalized Model of Mating Behaviour 226

Michael Turelli. A Reexamination of Stability in Randomly Varying versus Deterministic Environments with Comments on the Stochastic Theory of Limiting Similarity 244

G. A. Watterson and J. Perlow. Homozygosity in Three-Allele Populations 268

D. Auslander, J. Guckenheimer, and G. Oster. Random Evolutionarily Stable Strategies 276

C. Z. ROUX. Sex Differences in Linkage between Autosomal Loci . . . 295

M. MIRMIRANI AND G. OSTER. Competition, Kin Selection, and Evolutionary Stable Strategies 304

ALAN R. TEMPLETON AND EDWARD D. ROTHMAN. Evolution in Fine-Grained Environments I. Environmental Runs and the Evolution of Homeostasis 340

BERNARD P. ZEIGLER. On Necessary and Sufficient Conditions for Group Selection Efficacy 356

THOMAS W. SCHOENER. Effects of Density-Restricted Food Encounter on Some Single-Level Competition Models 365

PAUL R. LEVITT. The Mathematical Theory of Group Selection. I. Full Solution of a Nonlinear Levins $E = E(x)$ Model 382

MALTE ANDERSSON. Optimal Foraging Area: Size and Allocation of Search Effort 397
